

shraddha champaneri

chemist

B/1 shakti nagar society near sardar patel school van lack road borsad | 9328718122 | shraddhachampaneri77@gmail.com

Summary

A resume for a research and development (R&D) chemist can highlight skills and experience in:

Research and development: Developing new methods and products, and generating intellectual property

Experimentation: Designing experiments, analyzing data, and interpreting results

Collaboration: Working with cross-functional teams to advance research objectives

Communication: Providing clear and concise verbal and written communication with team members and supervisors

Technical skills: Using chemistry principles, laboratory techniques, and analytical instruments

Hard skills: Research and development (R&D), chemistry, formulation, analytical chemistry, high-performance liquid chromatography (HPLC), UV/Vis spectroscopy, polymers and polymer chemistry

Experienced Research and Development Chemist with a background in conducting innovative research projects and developing new products in a laboratory setting. Skilled in creating and testing formulations, analyzing data, and collaborating with cross-functional teams to drive product development. Strong understanding of chemical principles and analytical techniques.

Looking to leverage my expertise to contribute to the advancement of scientific research and development initiatives within a progressive organization.

Education

ssc **June, 2015 - March, 2016**
sardar patel school

Strong work ethic, and an eye for identifying and correcting errors, acknowledged for reliability, integrity, and quick learning ability.
Highly skilled in journal entry creation/updating, month-end

hsc **June, 2017 - March, 2018**
saraswati school

Career objective

A one or two-sentence statement that summarizes your career goals and how your skills align with the employer's needs

Education

Include details about school, such as any relevant courses, projects, or clubs you joined

bsc in chemistry **June, 2018 - April, 2023**
sp university

I am a dedicated, organized and methodical individual. I have good interpersonal skills, am an excellent team worker and am keen and very willing to learn and develop new skills. I am reliable and dependable and often seek new responsibilities within a wide range of employment areas.

msc in organic chemistry **June, 2021 - April, 2023**
cvm university

Career objective

To be a part of organization where the management structure recognizes and rewards loyalty, honesty, hard work and ambition of an employee by providing growth opportunities and necessary infrastructure that could contribute to the success of company.

Skills

data analysis

Data analysts use a combination of hard and soft skills to perform their jobs

A highly sought-after skill, data visualization allows analysts to communicate insights in a way that's easy to understand

problem solving

Problem-solving is a complex skill. It involves critical thinking, decision-making, creativity, and information processing.

Effective problem-solvers use a systematic approach

leadership

Leadership is the ability to guide and inspire others to achieve a common goal. It's based on interpersonal skills, values, and a commitment to collective success.

critical thinking

This skill helps analysts make sense of complex data sets and draw accurate conclusions.

analytical thinking

Analytical skills help you identify problems, investigate to find relevant facts, and find a logical solution.

good group working

Group work helps students learn how to work together, share ideas, and delegate responsibilities.
